

POLYMERY 2026 - List of Posters

- P-01** **N. Akhtar**, D. Melegová, K. Kozics, M. Bučková, A. Puškárová, D. Pangallo, A. Eckstein, A. Opálková Šišková
Antimicrobial and safety evaluation of essential oil-incorporated PLA/PHB biodegradable packaging films for food applications
- P-02** **A. Braunová**, V. Surkovová, M. Pešková, J. Víteček, Z. Walterová, K. Gunár, O. Kočková, P. Chytil, T. Etrych
Polymer modification of thrombolytics for more efficient stroke treatment
- P-03** **T. Ďurčová**, M. Ilčíková, T. Gröpelová, J. Osička, E. Achbergerová, J. Pecha, M. Mrlík
Porous gelatin-based hydrogel systems containing piezoelectrics BaTiO₃ nanoparticles: Effect of modification on the physical and processing properties.
- P-04** **A. Eckstein Andicsová**, N. Slobodová, M. Jurča, P. Janovský, A. Pandey, Y. R. Panthi, J. Vilčáková, J. Pflieger
From structural design to the characterization of polymers for memristor applications
- P-05** **M. Gurská**, A. Eckstein-Andicsová, I. Ščepánová, A. Vykydalová, A. Opálková Šišková, K. Mosnáčková, J. Mosnáček
Furan-based copolymers as sustainable materials for packaging applications
- P-06** **T. Hrivnák**, M. Pykal, M. Otyepka, M. Medved'
Tuning photophysical properties of stacked PAH aggregates for carbon-dot photocatalysts
- P-07** **L. Kaprálková**, I. Kelnar
B-glucan nanotubes for advanced applications
- P-08** **M. Kollárová**, M. Studenovský, T. Etrych, D. Starenko, M. Kovář, P. Chytil
Polymeric drug carriers of mitoxantrone for the treatment of cancer
- P-09** **M. Kováčová**, S. Rišová, E. Špitalská, D. Selyemová, Z. Špitalský
Hydrophobic carbon quantum dots with photodynamic antimicrobial activity
- P-10** **V. Krusberský**, L. Kučerová, R. Pola, M. Filipová, A. Stehlíková, K. Držíková, N. Udovrková, B. Lukač, A. Fekiačová, G. Kolníková, Z. Čierná, A. Tewari, M. Mego, T. Etrych
Antibody-polymer-drug conjugates as novel platform for cancer treatment
- P-11** **E. Müllerová**, T. Jacob, E. Čadová, V. Raus
Expanding the TAI strategy to water soluble monomers

- P-12** **A. Opálková Šišková**, K. Mosnáčková, A. Opálek, M. Bučková, A. Eckstein
Nisin-loaded PCL nanofibrous membranes: Boosting antibacterial efficiency and barrier properties for active food packaging
- P-13** **T. Pálszegi**
A model of a holographic polymer film with liquid-crystal polarization memory
- P-14** **M. Plachý**, M. Vaňková, J. Sedláček
Highly porous networks for CO₂ capture by Friedel-Crafts “knitting” of acetylene-based polymers
- P-15** **R. Pola**, P. Karabínoš, M. Kaňa, J. Pankrác, L. Šefc, N. Podhorská, M. Filipová, J. Bouček, T. Etrych
Targeted polymer nanoprobe for fluorescence-guided surgery of head and neck carcinomas
- P-16** **A. T. Rajeev**, M. Mičušík, A. Stepura, K. Mosnáčková, H. Peidayesh, I. Kühnert, H. Oosthuizen, A. Leuteritz, C.-C. A. Chen
A comparative study on the mechanical properties of biodegradable polymer composites reinforced with novel synthesized and commercial bioglasses
- P-17** **J. M. Scheibel**, K. Cavalcante, K. Z. Donato, G. K. Thirunavukkarasu, R. K. Donato, A. Jager, E. Jager
Evaluation of cargo–surface interactions in modified hexagonal boron nitride for drug delivery applications
- P-18** **R. Svoboda**
Thermo-physical modelling of calorimetric measurements utilizing Kapton foil as a substrate
- P-19** **I. Ščepánová**, A. Andicsová Eckstein
Bio-based amphiphilic nanoparticles for enhanced solubilization and controlled release of hydrophobic drugs
- P-20** **D. Tumacder**, A.-I. Cocârță, P. Bober
Polypyrrole/agarose conducting gels: synthesis and electrochemical evaluation
- P-21** **R. Vlasak**, M. Ilcikova, M. Mrlik
Optimization of mechanoATRP of glycidyl methacrylate through ligand and catalyst selection
- P-22** **A. Zhytskyi**, M. Mičušík, A. Stepura, P. Machata, J. Kollár, D. Zeleniakiene, G. Monastyreckys, P. Knotek, K. Zetková, V. Zima
Polymer composite coatings based on 2D MXene
